**Subject:** Small Mine Form

Hello Dave and Sarah, here is the internet site where all our forms are found. You need to complete the Small Mine Operation Form(MR-SMO) and send it to us with a map showing access, location, and proposed disturbance and the fee and bonding information. If there is existing disturbance in the area, it is important for you to identify this and include it with your permit, so that areas you do not want to disturb that are previously disturbed you will not be held responsible. we can not review the permit until this is received.
